

Arthur Torres

AI & AUTOMATION ENGINEER

Belo Horizonte, Brazil · arthuroliveiratorres@gmail.com · +55 31 99800-0636 · linkedin.com/in/torres-arthur · github.com/tutorres · torres-dev-ai.vercel.app

SUMMARY

AI & Automation Engineer with production experience building LLM-powered agents, Python automations, and full-stack AI applications. At Banco Inter's Global Operations team, delivered five automations saving **1.0 FTE in under 5 months** — shipped as containerized microservices onto the team's Kubernetes platform via Docker and GitLab CI/CD. Lean Six Sigma Yellow Belt. C1 English (EF SET 65/100).

EXPERIENCE

Banco Inter

Jan 2026 – Present

AI & Automation Engineer Intern — Global Operations · Belo Horizonte · On-site

- Onboarding Decision Engine — automated evaluation of onboarding payloads, returning structured decisions to analysts via API and eliminating manual review (0.4 FTE saved)
- Account Alert Automation — end-to-end email notification pipeline for accounts requiring financial attention, triggered automatically with zero manual intervention (0.3 FTE saved)
- Built three additional tools — LLM document analysis agent, address validation pipeline (FastAPI + web scraping), and transaction integrity validator — saving 0.3 FTE combined, all deployed as microservices on Kubernetes via Docker and GitLab CI/CD
- Developed LLM agents for contextual analysis supporting governance and approval workflows for the US operations team

Stack: Python · SQL · FastAPI · Selenium · Pandas · LLM Agents · Groq API · Docker · Kubernetes · GitLab CI/CD

Akyou Soluções

Apr – Dec 2025

Backend Engineer — AI & Accessibility · Remote

- Took a document-intelligence product from scratch to a working prototype, owning it end to end
- Built the Python + OpenAI backend and LLM pipelines for unstructured PDF processing — extracting and restructuring complex documents into accessible, structured output
- Built the TypeScript frontend from the ground up and deployed the backend on AWS Elastic Beanstalk behind a load balancer

Stack: Python · TypeScript · OpenAI API · LLM Pipelines · AWS Elastic Beanstalk

PROJECTS

Financial Intelligence Dashboard github.com/tutorres · Live demo

Python · DuckDB · PyTorch · Groq API · Streamlit · Pandas · Plotly

End-to-end pipeline with medallion architecture (bronze/silver/gold), LSTM trend classification, Text-to-SQL LLM interface, and real-time market chat.

Vale Desenvolver 2026 — Mining Fleet Telemetry github.com/tutorres · Case study

Python · XGBoost · LightGBM · SHAP · DuckDB · pytest

Predictive pipeline over a 37.1M-record telemetry dataset from Vale S.A.'s Itabira mine, anticipating critical "Don't Go" failures. Temporal validation (no leakage), extreme class-imbalance handling, SHAP explainability, and 93 unit tests (TDD).

SKILLS

CORE	Python (advanced) · SQL (advanced) · FastAPI · Selenium · pytest · Git
DATA	DuckDB · Pandas · Plotly · Streamlit · OpenPyXL
ML / AI	LLM Agents · RAG · OpenAI / Groq API · PyTorch · LSTM · XGBoost / LightGBM · SHAP
INFRA	Docker · Kubernetes · GitLab CI/CD · AWS
PRACTICES	TDD · Spec-Driven Development · Agentic coding workflows

EDUCATION

CEFET-MG — B.Eng. Computer Engineering

2024 – 2030 (est.) · 5th semester

Centro Federal de Educação Tecnológica de Minas Gerais · Belo Horizonte, Brazil
